

26 June 2020

**Pires Investments plc**  
("Pires" or the "Company")

**Getvisibility video interview**

Pires Investments plc (AIM: PIRI), the investment company focused on next generation technology, as previously announced, is preparing a series of video interviews with the founders and leaders of the companies Pires is invested in, both directly and through its 13% interest in Sure Valley Ventures ("SVV").

SVV is a venture capital fund focused on investing in the software technology sector with a specific focus on artificial intelligence, the internet of things and augmented and virtual reality.

The Company has posted a new video in relation to Visibility Blockchain Limited, a private company incorporated in Ireland which trades under the name Getvisibility ("Getvisibility"), which can be accessed via the following link: <https://piresinvestments.com/media/>. Besides the Company's indirect investment through its interest in SVV, in March 2020, Pires invested €250,000 directly in Getvisibility.

Getvisibility is an artificial intelligence security company addressing the substantial and increasing problem which corporations face in storing, sorting, accessing and protecting data. Getvisibility has developed and launched a software platform using artificial intelligence that delivers visibility over a wide range of data.

Getvisibility recently announced that it believes that it could be awarded up to €20 million in business following new Cybersecurity Maturity Model Certification (CMMC) requirements for suppliers to the US Department of Defence.

**Notes to Editors**

## **About Pires Investments plc**

Pires Investments plc (AIM: PIRI) is an investment company providing investors with access to a portfolio of next generation technology businesses with significant growth potential.

The Company is building an investment portfolio of high-tech businesses across areas such as Artificial Intelligence ("AI"), Internet of Things ("IoT"), Cyber Security, Machine Learning, Augmented Reality and Virtual Reality ("AR/VR") and Big Data, which the Board believes demonstrate evidence of traction and the potential for exponential growth, due to increasing global demand for development in these sectors.
